PROFESSIONAL SUMMARY

Senior Mobile Application Developer with 10+ years of experience specializing in Flutter, Android, Java, and Kotlin, with extensive experience developing production applications for FinTech, payments, POS, KYC, banking, and enterprise solutions.

Experienced in taking mobile products through the complete lifecycle, including architecture, development, API integration, device/SDK integration, testing, deployment, production support, and release management. Strong hands-on experience with POS terminals, payment devices, printers, QR-based payment systems, OCR, face liveness, biometric verification, and financial APIs.

Currently developing FinTech and payment solutions for the Qatar market, with experience delivering applications for Ooredoo Qatar and working on a FinTech application with Qatar Islamic Bank. Experienced working directly with clients, project managers, technical teams, and business stakeholders.

CORE TECHNICAL SKILLS

Mobile: Flutter, Dart, Android, Java, Kotlin, Android SDK, MVVM, BLoC, Equatable, Repository Pattern, Clean Architecture, GoRouter

FinTech & Payments: QR Payments, UPI, Stripe, Razorpay, Payment SDKs, POS Applications, PIN Pad Integration, Financial APIs

KYC & Identity: OCR, Document Scanning, Face Detection, Face Liveness, Face Matching, Regula SDK, Smart Engine SDK, Aadhaar Verification

POS & Hardware: PAX A920/A920 Pro, Sunmi P2 PinPad/V3H/P3H, Topwise T6 Dual Display, POS Printers, Zebra & Sunmi Bluetooth Printers

Backend & APIs: REST APIs, Dio, JSON, .NET Core, C#, Java Backend, Python, PHP, Azure Functions

Cloud & Tools: Firebase, FCM, Crashlytics, Azure Notification Hub, Git, GitHub, Bitbucket, Azure Repos, CI/CD, Jira, Play Store, Maxstore, Sunmi App Store

PROFESSIONAL EXPERIENCE

Senior Android Developer — RechargeIndia Pvt Ltd, Kochi

Oct 2021 – Present

- Lead mobile application development across Flutter and Android (Java/Kotlin) for FinTech, POS, KYC, and business applications.
- Developed and maintained the Merchant Super App, including its evolution from the earlier Java-based DDMP Merchant POS application to an enhanced Flutter implementation.
- Developed the MPOS application, initially using Java and later contributing to its enhanced Flutter implementation.
- Developed the Sales Team application using Java, including integration with external Bluetooth printers.
- Developed a KYC application for SIM activation, implementing OCR, document processing, and face liveness capabilities.
- Integrated Smart Engine SDK for OCR and Regula SDK for document and face verification workflows.
- Developed applications for multi-display Topwise devices and implemented device-specific functionality.
- Implemented receipt printing through integrated POS printers and external Zebra/Sunmi Bluetooth printers.
- Worked with PAX, Sunmi, and Topwise payment/POS devices, including enabling Google Play Services on supported PAX devices.

- Implemented Firebase Cloud Messaging, Firebase Crashlytics, and Azure Notification Hub for notifications, monitoring, and production support.
- Implemented real-time location fetching and Google Maps integration.
- Developed Azure Functions and contributed to backend modules using .NET Core and C#.
- Implemented Flutter applications using BLoC, Equatable, Repository Pattern, Clean Architecture, Dio, and GoRouter.
- Developed Android applications using Java/Kotlin with MVVM architecture.
- Developed reusable Flutter UI components, including a custom liquid-glass style bottom navigation component.
- Solved complex device integration challenges involving POS printers, multi-display devices, Google services, and payment hardware.
- Responsible for application releases and deployments across Google Play Store, Maxstore, Sunmi App Store, and device-specific distribution channels.
- Implemented CI/CD workflows using Azure Repos and Google Play Store deployment.
- Managed Git repositories, branching, code reviews, production releases, and application maintenance.
- Conducted technical discussions with clients and supported project managers with technical analysis and implementation decisions.
- Participated in requirement analysis, task estimation, Jira sprint planning, production support, and technical discussions.
- Mentored junior developers and contributed to code reviews and technical guidance.
- Worked as the primary mobile application developer responsible for mobile development across multiple products.

Key Project — Merchant Super App

- Production FinTech/POS application used by approximately 2,000 merchants across Qatar.
- Platform has processed 15+ million transactions.
- Supported multiple POS devices and merchant environments.
- Implemented payment-related functionality, receipt printing, notifications, location services, device integration, and production deployment.

Key Project — Current FinTech Application

- Currently working on a QR-based payment FinTech application.
- Developing the mobile application using Flutter and Android technologies and integrating REST APIs.
- Working with Stripe and PAX, Sunmi, and Topwise payment/POS devices.
- Contributing to technical implementation and stakeholder discussions for the Qatar market, including a project with Qatar Islamic Bank.
- Participated in demonstrating the application to the Qatar Central Bank.

Senior Software Engineer — Ewire Softtech Pvt Ltd, Kochi

Sep 2019 – Oct 2021

Ewire RuPay — FinTech Application

- Developed and released Ewire RuPay using Java and Kotlin, including an earlier version of the application.
- Integrated Razorpay SDK for payment processing and banking services with Yes Bank.
- Implemented functionality supporting bank account creation, physical card management, ATM withdrawals, and multiple financial transaction types.
- Developed the application as a reusable FinTech platform with API-driven branding, logos, and themes for multiple clients.
- Contributed to mobile, backend, and technical implementation using Java and Python.
- Worked closely with the CTO on architecture, technical decisions, development, and delivery.
- Acted as a senior engineer responsible for overall technical development; worked in a team of approximately 10 members.
- Contributed to backend development using Java

Other Projects

- Developed Neericode Service Co-operative Bank application using Flutter and integrated banking APIs.

Senior Android Developer — INFRAP, Kochi

Jun 2018 – Sep 2019

Invstars — Property Application

- Developed the Android application using Java for the Australian property market.
- Implemented real-time chat functionality using Firebase and Firebase Realtime Database.

Knatree — Family Tree Application

- Developed the Android application using Java.
- Designed and implemented the family tree visualization and UI, solving complex relationship-rendering challenges.
- Application achieved 100K+ downloads.

Senior Android Developer — Forsight Technologies, Kochi

Dec 2015 – Dec 2017

- Developed My Payroll Master, an enterprise Android payroll application using Java.
- Implemented employee attendance tracking, real-time location tracking, and reporting functionality.
- Worked on application development, maintenance, and feature implementation.

SELECTED PROJECT EXPERIENCE

- Merchant Super App — Flutter, Android, FinTech, POS
- MPOS / DDMP Merchant POS — Java, Flutter, POS
- Sales Team App — Java, POS, Bluetooth Printers
- KYC / SIM Activation — Flutter, OCR, Face Liveness
- Current FinTech Application — Flutter, QR Payments, Stripe
- Ewire RuPay — Java/Kotlin, Razorpay, Yes Bank
- Neericode SCB — Flutter, Banking APIs, Biometrics
- Invstars — Android Java, Firebase, Realtime Chat
- Knattree — Android Java, Family Tree UI
- My Payroll Master — Android Java, Attendance, Location

OPEN SOURCE

- Sunmi Device Integration Flutter Plugin — Developed a custom Flutter plugin for integrating SUNMI POS device functionality with Flutter applications.
- GitHub projects and source code: [GitHub](#)

CERTIFICATION

Flutter Developer Certificate — Udemy

Completed training in cross-platform mobile application development using Flutter and Dart, including application development, debugging, and deployment.

EDUCATION

B.Tech in Information Technology — ToCH Institute of Science and Technology | 2013

ADDITIONAL PROFESSIONAL EXPERIENCE

- Experience working on projects for the Qatar and Indian markets.
- Experience working directly with clients and technical/business stakeholders.
- Participated in major technology events including Mobile World Congress (MWC) Doha and Web Summit.
